TRUE DUAL-LAYER EMAIL SECURITY
FOR NZ ENTERPRISE & GOVERNMENT

As the world becomes more connected, email-based threats are growing exponentially, preventing organisations of all kinds from performing at their best. The risk of both inbound & outbound, and regional & global security anomalies is a key cause for concern for IT & Security roles within an organisation.

Delivering trusted and secure solutions to Enterprise & Government for over 15 years.

SMX 365 is the preferred email security choice, with over 70 New Zealand public sector agencies choosing SMX. SMX's approach to email security is unrivaled, encompassing multiple layers of protection, conformance with modern RFCs and best practice, data & workflow driven, and strong partnerships with the likes of Microsoft, Government agencies, M3AAWG, and best of breed Security Vendors.

Protecting ~25% of all O365 mailboxes in New Zealand

Processing 1/3 of all NZ's mail-flow*

True Dual Layer: SMX 365 + EOP/ATP

Designed specifically to deliver dual-layered security with Microsoft 365 - Exchange Online / Advanced Threat Protection (EOP/ATP).

Exceptional Deliverability

Ensure business critical, transactional, or commercial email reaches mailboxes. High reputation delivery nodes across Australasia.

Global & Regional Threat Protection

Tailored for our unique NZ/AU threat landscape. Using a combination of signature based, advanced heuristic and AL/ML technologies to provide complete protection for both known and emerging threats.

SmartRules® Supporting Complex Workflows

Control of mail-flow for compliance, DLP or advanced content rules.

The Competition

Other Email Gateways → Microsoft EOP/ATP (X) → Office 365 Inbox

SMX 365

SMX 365 Email Gateways → Microsoft EOP/ATP (✓) → Office 365 Inbox

SMX 365 does not disable or compromise Microsoft 365 productivity or security capabilities like ATP & EOP, **unlike the** majority of other email gateways in their quest to block email threats.

SMX 365 applies a 'better together', defense-in-depth approach to their solution architecture to ensure organisations can utilise and optimise M365 specific skill sets and manage their full security suite within one dashboard.

SMX 365 KEY FEATURES

ACCURACY
SMX 365 delivers high level accuracy through a unique, highly tuned classification engine. Security signals from proprietary and third-party feeds are synthesised stopping threats with minimal false positives.

SERVICE MANAGEMENT PLATFORM
Cloud-based management portal; simplifying administration, reporting, migration and the management of complex workflows & rules.

DATA SOVEREIGNTY
The SMX 365 cloud security platform is deployed across Australasian data centres, meeting complex data sovereignty requirements to keep all types of organisations compliant.

IMPERSONATION PROTECTION
An organisations most important stakeholders are protected against targeted BEC/spear-phishing impersonation attacks. Board Members, C-Level Executives, Senior Team Members and Finance Teams can rest assured their identity is secure.

MONTHLY THREAT REPORTING
Operational threat reporting with visual and in-depth data to manage and mitigate email risk for your unique business environment.

CLOUD MIGRATION & TRANSFORMATION
Advanced email routing and migration APIs, tools, and services, enable users to migrate to the cloud easily and securely.

PROVISIONED ON AZURE
Ability to securely scale email gateway requirements with SMX 365 on Azure. The world's most trusted cloud furthers SMX's ability to provide users with the most secure, rapidly deployed solution.

LOCAL SUPPORT
24/7 support delivered through a knowledgeable and locally based service team, available if you need technical support, have a question, or want information on the latest threats.
